SST: A LEGACY OF INDUSTRIAL EXCELLENCE

About Us

Founded in 2003 as a proprietary entity by the Late Shri Samshersingh Indalsinghji Tomar, SST Technisolutions has steadily evolved into a cornerstone of excellence within the industrial sector.

In 2018, SST transitioned into a Private Limited Company, marking a significant milestone in our journey. This transformation, coupled with the establishment of our headquarters in Jalna, Maharashtra, reflects our continuous growth and adaptation to the ever-changing demands of the industry.

Today, SST is guided by the second generation of the Tomar family, who uphold the visionary principles of our founder while steering the company towards new horizons. With over two decades of rich experience, SST Technisolutions has established itself as a trusted partner in the industrial landscape, supported by a seasoned team of professionals who possess deep expertise in the complexities of the metal sector and bring a wealth of knowledge and technical acumen to every project.

20⁺

Years of Legacy

VISION

To be one of the leading service providers in the country, having technical excellence and cost-effective solutions with the highest standards of safety and sustainability.

MISSION

Focus on maximizing client productivity and providing a competitive advantage by optimizing production, maintenance, workforce, facility management, and proper utilization of resources.

Operation & Maintenance Services

At SST Technisolutions, we take pride in our capability to deliver precise and safe operations and maintenance (O&M) services for facilities across the steel sector, including Steel Meltshops, Rolling Mills, Strip Mills, Structural Mills, Tube Mills, and Cold Rolling Mills. Our team is composed of highly skilled professionals who specialize in managing the intricate and complex processes that these facilities demand.

By integrating cutting-edge technology with tried-and-tested operational methodologies, we ensure that every phase of the production and maintenance process runs smoothly, enhancing plant performance while minimizing downtime.

Our tailored solutions are designed to enhance the efficiency and performance of facilities, including:

- Steel Meltshops (Induction Furnace – from 5 to 50 MT, Arc Furnace)
- Continuous Casting Machines (Billet Casters, Bloom Casters, Slab Casters, Casters of all Radius & Strands)
- Rolling Mills, Strip Mills, Structural Mills, Tube Mills, and Cold Rolling Mills at various levels of engagement
- Scrap Yard Management
- Wastage Generation Management (Slag, Mill Scale)

Our expertise allows clients to offload the technical complexities of running these facilities, enabling them to concentrate on their core business objectives. With a holistic approach to asset management, we oversee all facets of operations, from production scheduling and monitoring to health, safety, and environmental management.

Engineering Procurement & Construction Solutions

We offer Site Selection, Layout Design, Engineering Solutions, Procurement of Machinery, Erection of Machinery, and Fabrication of Structures.

Our expertise lies in the complete management of industrial machinery, offering specialized services in design, installation, and modernization. Our tailored solutions are designed to optimize the efficiency and performance of various facilities, including:

- Induction Furnaces (Melting, Holding, Pouring)
- Continuous Casting Machines (CCM) (Billet Caster, Bloom Caster, Slab Caster)
- Rolling Mills (Hot, Cold, Coil)
- Strip Mills (Hot, Cold, Temper)
- Tube Mills (Seamless, Welded)
- Material Handling Equipment (Conveyors, Cranes, Hoists)
- Argon Oxygen Decarburization (AOD) (Stainless Steel Production)
- Electric Arc Furnaces (EAF) (Steel Production)
- Ladle Refining Furnaces (LRF) (Steel Refining)
- Crushers (Jaw, Cone, Impact)
- Boilers (Water Tube, Fire Tube)
- Pumps and Compressors (Centrifugal, Reciprocating)

Utility Service Management

We provide comprehensive erection and management services for water complex pipelines, substations, and treatment plants. Our technical expertise covers every phase, from design and installation to ongoing operational management.

Electrical Infrastructure Expertise

Our comprehensive solutions for electrical infrastructure encompass every aspect from installation to maintenance and upgrades. We specialize in ensuring that your power systems are efficient, reliable, and built to last. Our expertise includes:

- High and Low Voltage (HT/LT) panels for efficient power distribution
- Gas Insulated Switchgear (GIS) for enhanced safety and reliability
- Circuit Breakers for precise control and protection
- Conductors, Reactors, and Capacitors for optimized power flow
- Automatic Power Factor Correction (APFC) panels for energy efficiency
- Cables, Poles, and Transformers for robust connectivity

Workforce Management & Consulting

We have a great pool of workforce. We also do payroll management & recruitment services. We ensure that your operations are supported by a capable and professional workforce, leading to:

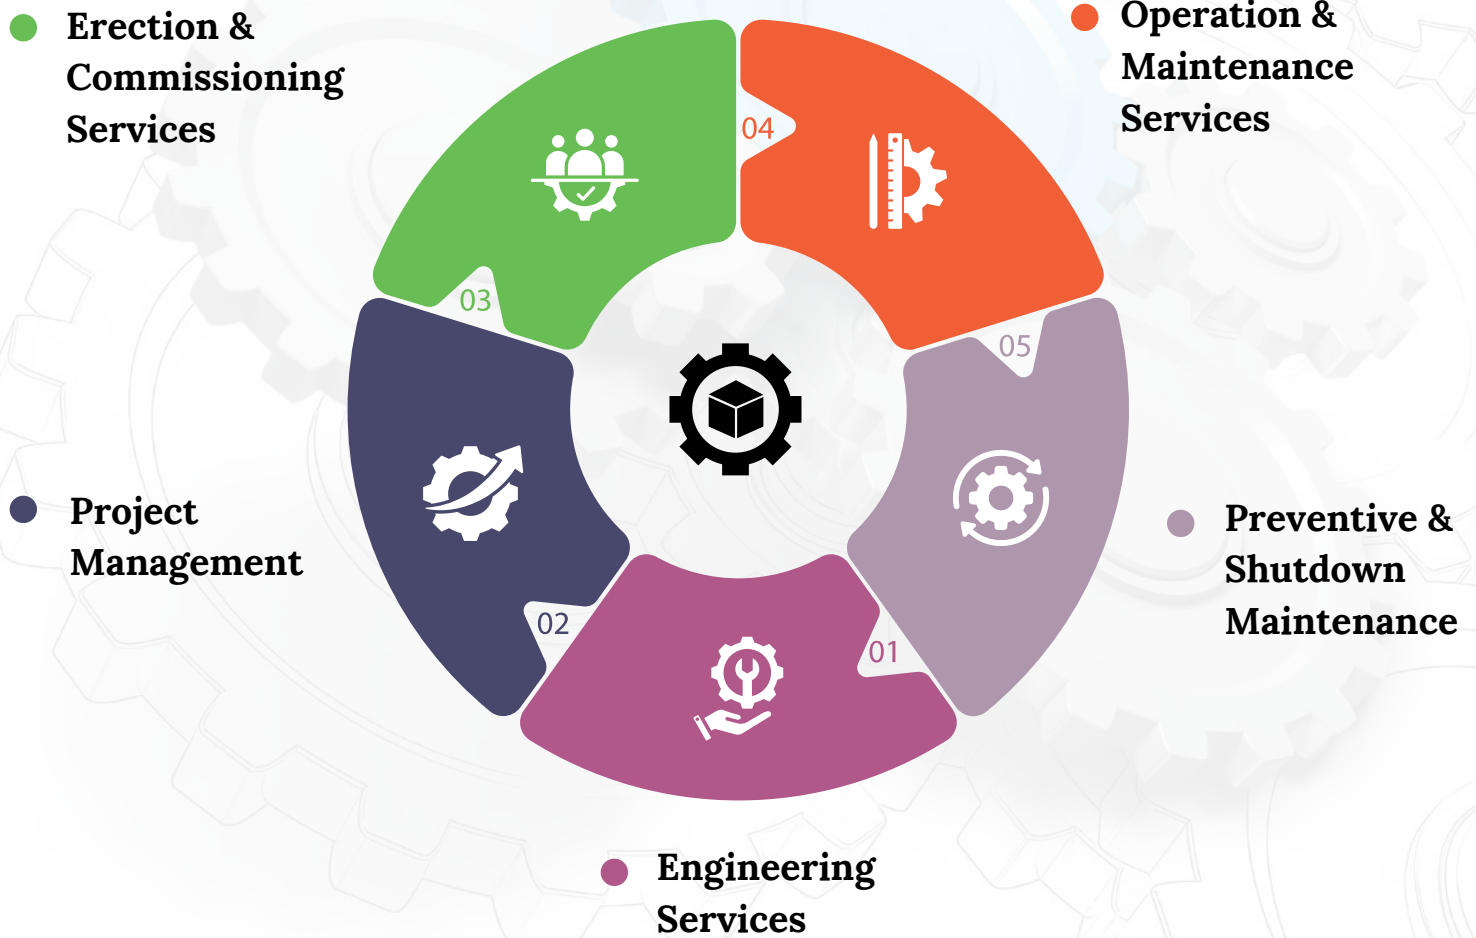

- Highly Skilled Professionals (Engineers, Technicians, Specialists)
- Semi-Skilled Labourers (Welders)
- Unskilled Labourers (Entry-Level, General Labour)
- Seasoned Experts in Specialized Fields (Project Management, IT, Finance)
- Flexible Workforce (Temporary, Contract, Permanent, Part-Time)
- Customized Staffing Solutions for Peak Periods or Special Projects

OUR SERVICES ALSO INCLUDE:

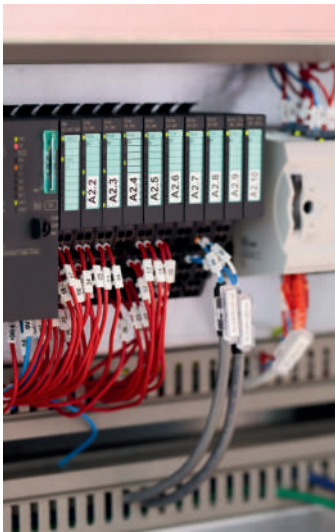

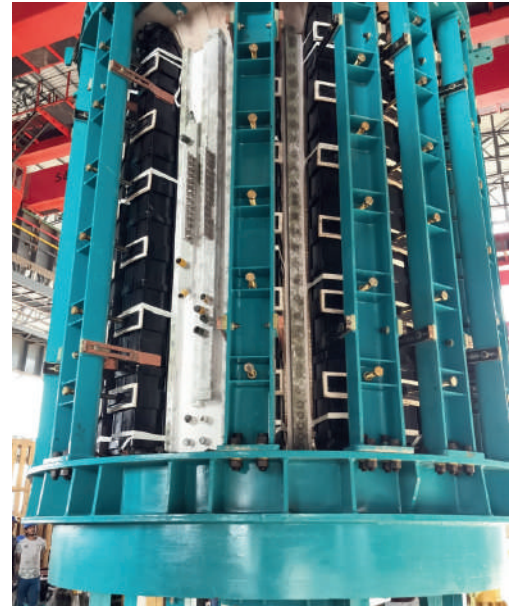

- Payroll Management
- Recruitment Services
- Workforce planning and strategy development
- Talent acquisition and recruitment services
- Performance management and improvement
- Training and development programs
- Labor relations and compliance support
- HR advisory services

SST's Comprehensive Services include:

We provide end-to-end solutions for steel melt shops and rolling mills, from concept to commissioning, supported by our expert technical manpower. With a deep commitment to excellence and timely delivery, SST Technisolutions has become a trusted partner in the metal industry, and we are known for our leadership in steel sector engineering, project management, and operations.
